DASCOM®
SOLUTIONS FOR BUSINESS PRINTING

T5040

With a speed up to 600 characters / sec. The T5040 processes a variety of print media, such as passports and pass-books, checks and receipts, through to A5 and A4 form sets. The flatbed design guarantees the safest paper handling, and additional features such as automatic document orientation and automatic print head spacing (AGA) provide unsurpassed ease of use.

The T5040 standard supports the printing of individual documents via the serial interface with a security protocol, as required in bank environments. By default, there is also a USB and parallel interface for flexible connections and for multi-user use. A model with a 2nd serial port is also available.
